

Dr. Kenzo Kase, DC

Founder:
Kinesio® Taping Method and
Kinesio® Tex Tape

Dr. Kenzo Kase invented and developed the Kinesio® Taping Method over 30 years ago. The Kinesio® Taping Method is designed to facilitate the body's natural healing process while allowing support and stability to muscles and joints without restricting the body's range of motion. It successfully treats a variety of orthopedic, neuromuscular, neurological and medical conditions.

The method originated in Japan in 1973 and over the years it has stretched its horizons to countries worldwide. Currently, the method is being used by occupational and physical therapists, athletic trainers, chiropractors, acupuncturists, and other health care practitioners alike.

Dr. Kase still teaches his method and continues to be active in the evolution of the technique and product.

About Kinesio:

Kinesio® Taping works in conjunction with the body's natural healing capabilities. It generates lift, which improves circulation of the blood, clears up lymphatic congestion and alleviates pressure on pain receptors. Simply put, you'll feel better faster.

Kinesio's® unique construction doesn't restrict natural range of motion. And because of its water-resistance and natural breathability, tape applications range from three to five days.

- Elastic Cotton Fiber Strip with unilateral stretch moves with muscles while supporting them.
- 100% medical grade acrylic adhesive provides the best adherence to the needed area of the body.
- Kinesio's® Patented Wave pattern allows for optimal breathing and comfort while it's applied.
- Totally latex free eliminates any allergy worries.

Various uses:

AC Joint	Erector Spinae	Iliotibial Band
Achilles Tendon	Fascia Correction	Ligament Correct
ACL	Finger Sprain	Lymphatic Correct
Ankle Sprain	Frozen Shoulder	MCL
Bursitis	Geriatric Taping	Metatarsal Arch
Carpel Tunnel	Hallux Valgus	Myofascial
DeQuervains	Hammer Toe	Osteoarthritis
Dislocations	Hamstring Strain	Patella Tracking
Epicondylitis	Headache	Pediatric Taping

Pain

- Neurological suppression of pain occurs by applying the tape to the affected area.

Lymphatic

- Kinesio® Taping will channel excess fluid to the nearest lymph node allowing the fluid to be distributed throughout the body as normal.

Support

- Kinesio® Taping targets weakened or overused muscles by taping over and around the affected area.

Stability

- Kinesio® Taping helps to correct joint missalignment due to abnormal muscle tension, restoring normal fascia and muscle function.

"I really cannot believe the improvement and pain relief I've received from my physical therapist applying your tape. I have cut way back on pain meds as a result. I couldn't use my left arm due to the severe pain in my shoulder, and now I have greater movement. I have cervical and thoracic problems and have gotten relief as well to those areas."

Lana Chapman

Testimonials:

"I was skeptical at first, wondering how in the world can pieces of tape help my pain...but it did!! After a full day activity, I was fully expecting my back to be in pain like usual, but it didn't! For the first time in 6 months my back did not hurt."

Amanda Monk

"I just can't believe that Kinesio® Tex Tape has done so much for me and my lupus affecting my hands and fingers. Along with moist heat treatment, medication, and tape I am able to peel potatoes, put socks on, sew and type. I still have a ways to go, but to be able to do the simple things is a blessing. Thanks to Kinesio® Tex Tape."
